DETAILED ACTION

Status of the Claims

Claims 1-4, 8-11, 13-20, 23, 24 and 29-33 have been canceled. Claims 4-7, 12, 21, 22, 25-28 and 34-42 are pending. Any rejection or objection not expressly repeated has been withdrawn. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Double Patenting

Claims 4-7, 12, 21, 22, 25-28 and 34-42 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 19-33 of U.S. Patent No. 6,596,699. Although the conflicting claims are not identical, they are not patentably distinct from each other.

The claims of '699 are drawn to a medical device with a surface contacting bodily fluids coated with a silyl-heparin covalent complex with a condensate comprising a polycation and nucleic acid directly and non-covalently bound to the heparin. In this case, the nucleic acid is a bioactive molecule. It would be obvious to one of ordinary skill to select any of the claimed devices, one of which is a graft, which is a sub-genus of "wound dressing." Regarding claims 21 and 22, it would be within the scope of the artisan to optimize the value of these variables through routine experimentation. Claims 21-29 are drawn to the preparation of these devices. Regarding claims 27 and 28, the claims do not include the attachment of a second bioactive molecule, such as an antibiotic. However, it would be within the scope of the artisan to add and

additional bioactive molecule for the combined effects. Regarding antibiotics, the specification expressly describes an antibiotic as a preferred bioactive molecule. The claims do not recite a method of use. However, the use of the particularly claimed medical devices would be obvious to one of ordinary skill.
